1   INTRODUCTION

This document should be used to verify a Customer Adaptation for an NTF.

On an NTF, a Customer Adaptation is a new/modified language phrase file.

Uppgjord (även faktaansvarig om annan) - *Prepared (also subject responsible if other)*		Nr - *No.*			
ERMNIKA		7/152 41 - CRH 109 127 Uen			
Dokansv/Godkänd - *Doc respons/Approved*	Kontr - *Checked*	Datum - *Date*	Rev		File
DST/D (R Enqvist)		2003-07-04	PA1		

1.1 Scope of test objects

Test that the new language package works, e.g. verification of the installation and the modified/new language phrase file.

1.2 Time Estimation

5-10 mh

2 TEST CONFIGUTATION

2.1 Hardware Tools

None

2.2 Software Tools

- ca_ntf_<customer>_<rel>.<product number>.solaris8.sh (The built Customer Adaptation package)

2.3 Hardware Configuration

- An installed MoIP system.

2.4 Software Configuration

- The NTF needs to be installed according to ref. [1] Installation Guide NTF.

2.5 Test Data Requirement

None

3 MISCELLANEOUS TESTS

3.1 Verification of a Customer Adaptation Package

All test cases require that an NTF are installed according to ref. [1] Installation Guide NTF.

3.1.1 Test Cases

3.1.1.1 Verify that it is possible to install the Customer Adaptation on the NTF host.
Action: Install the Customer Adaptation according to ref. [1] Installation Guide NTF.
Result: The installation shall work as it says in the IG, and no error messages should be displayed during installation. The VERSION file and MCR should be updated with the correct CA version. The templates directory should be updated with the new/modified phrase file.

All test cases below requires that a subscriber with the new/modified language as prefferred language is added to MUR. All definition of the notification filters should be made in MEC using this subscriber.

3.1.1.2 Verify that notification with header information works.
Action: Define a notification filter with SMS notification with header information for all message types. Send any message type (email,fax or voice) to the subscriber.
Result: A notification should reach the subscriber and the notification should be correct accoding to how the "h=" string in the phrase file is configured.

3.1.1.3 Verify that notification with subject information works.
Action: Define a notification filter with SMS notification with subject information for all message types. Send any message type (email,fax or voice) to the subscriber.
Result: A notification should reach the subscriber and the notification should be correct accoding to how the "s=" string in the phrase file is configured.

3.1.1.4 Verify that notification with count information works.
Action: Define a notification filter with SMS notification with count information for all message types. Send any message type (email,fax or voice) to the subscriber.
Result: A notification should reach the subscriber and the notification should be correct accoding to how the "c=" string in the phrase file is configured.

3.1.1.5 Verify that WAP push notification works. (If WAP Push is used in the system)
Action: Define a notification filter with WAP Push notification for all message types. Send any message type (email,fax or voice) to the subscriber.
Result: A notification should reach the subscriber and the notification should be correct accoding to how the "WapPushText" string in the phrase file is configured.

Uppgjord (även faktaansvarig om annan) - *Prepared (also subject responsible if other)*		Nr - *No.*		
ERMNIKA		7/152 41 - CRH 109 127 Uen		
Dokansv/Godkänd - *Doc respons/Approved*	Kontr - *Checked*	Datum - *Date*	Rev	File
DST/D (R Enqvist)		2003-07-04	PA1	

3.1.1.5 Verify that any extra notification works.
If any extra notification configurations are added to the phrase file, make sure that all these configurations are verified.

3.1.1.6 Verfify that it is possible to uninstall the Customer Adaptation on the NTF host.
Action: Uninstall the Customer Adaptation according to ref. [1] Installation Guide NTF.
Result: The uninstallation shall work as it says in the IG, and no error messages should be displayed during uninstallation. The CA version should be removed from the VERSION file and MCR. The new phrase file should be removed from the templates directory or the modified phrase file should be restored to the old one.
